

FIRE & SECURITY SOLUTIONS

COMBINING CUTTING EDGE
TECHNOLOGY AND INNOVATION

OUR ACCREDITATIONS

WHO WE ARE AND WHAT WE DO

Kings Secure Technologies brings together cutting-edge technology and innovation across the Fire & Security sectors; designing bespoke solutions that recognise risk mitigation and the need for cost control, but continue to deliver exceptional customer service. By using trend and data analytics to make long term sustainable decisions for our clients, and with a nationwide reach and international capability, Kings delivers a one source solution for many of the world's best-known businesses.

We have a long-standing commitment to excellence and innovation in the industry. As the sector advances, we are investing to develop and grow our market position with the ambition to be the largest independent Fire & Security provider in the UK.

The team here at Kings delivers a service to its customers that is innovative, professional and effective. These are attributes that have served us well through more than 50 years of growth, and they will continue to serve us in the future.

OUR MISSION

Kings Secure Technologies' mission is to offer the latest and most innovative technologies to deliver the best value and most robust solutions to our growing customer base.

PROJECT MANAGEMENT

We have an enhanced style of Project Management; our Project Managers are engaged from the start, liaising with relevant stakeholders, providing a programme of works that suits the client's timescales, facilitating when equipment can be delivered, overseeing dependencies from third party contractors, making sure all involved are communicating to meet the requirements of the project and, of course, ensuring that projects are delivered on time and on budget.

We assign strict KPIs to every project utilising our DYMENSiON software portal; a secure browser-based solution providing access to many layers of data.

Our customers can get an accurate, real-time picture at site level enabling risk profiling and resource planning.

STARBUCKS, MILAN

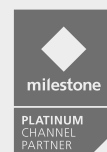

WINNING PARTNERSHIPS

Kings Secure Technologies is proud to partner some of the most well-known innovators and disruptors, software developers and designers across the whole sector. This unique position allows us to provide our customers with a truly complete solution.

OUR PARTNERS

INTEGRATED SECURITY SOLUTIONS

Kings Secure Technologies can design and install fully integrated security systems comprising of Access Control, CCTV and Intruder Detection to meet the client's requirements.

Our systems adhere to the latest regulations and can be fitted as audible only, or on a fully monitored basis, which allows a choice of agreed actions, including police response.

Kings utilises a full range of state-of-the-art detection devices including motion detection, vibration sensors, glass break detection and magnetic contacts.

We also have the ability to enhance systems with hold-up alarms, smoke producing machines and smart water technology.

Kings' engineers are trained to work on all industry standard equipment, whilst we will only install open protocol technology to ensure ongoing viability.

Kings utilises a **full range of state-of-the-art detection devices** including motion detection, vibration sensors, glass break detection and magnetic contacts.

Kings designs, installs and maintains a wide range of fire detection, gas suppression and life safety system solutions.

FIRE SYSTEMS

Early warning and detection of fires can help prevent the loss of lives and also the catastrophic damage to properties that fire can cause.

Kings designs, installs and maintains a wide range of fire detection, gas suppression and life safety system solutions. We are confident that the services we can provide will be both technical and cost effective to match the expectations and specific requirements of our clients.

All fire detection and life safety systems that we provide are designed, installed and maintained to meet the requirements of the BAFE SP203-1 accreditation scheme and all relevant British Standards.

SECURITY PERSONNEL

Security Personnel

Kings provides a range of specialist security guards to protect property, people and reputation.

Kings is an SIA approved contractor and accredited to NSI Gold Standard. Every security officer is fully licensed and provided with bespoke training dependant on the needs of our clients, and the environments in which they are working. We invest in all of our Security Personnel, providing a range of employee benefits including the opportunity to enter our apprenticeship programme and achieve a recognised NVQ qualification.

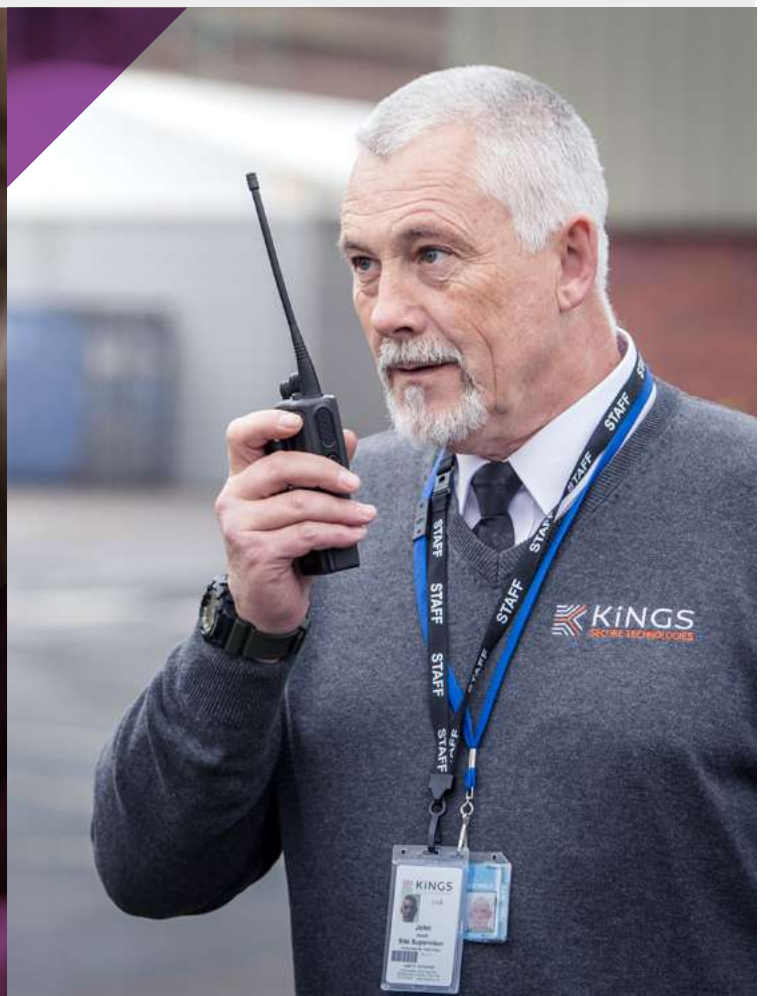

Kings takes a fresh and innovative approach to security provision; combining our experience in deploying security officers with our cutting edge technology to deliver tailored solutions to our clients.

Patrolling

Our mobile patrol vehicles provide a high visibility deterrent through scheduled and random patrols.

Kings works with our clients to understand the risks at each site and agree internal or external patrol routes. By fitting tags at agreed points, which are scanned by our patrol officers, we are able to provide site specific patrol reports. These reports are used to highlight any security or health and safety risks and to ensure additional focus is given to key areas.

All our patrol officers are screened and vetted to BS 7858. For extra resilience, our national network of pre-vetted, approved sub-contracting partners help us to deliver a localised service throughout the UK.

Key Holding

Kings' unique approach to Key Holding using our network of fully trained SIA response officers provides a quicker response to our clients' needs.

Lock and Unlocks

Utilising our SIA trained officers, we remove the risk of lost business through waiting for a staff key holder to open up. Our service also provides the opportunity for our clients to provide access to their premises out of hours for emergencies, lone workers or deliveries.

Our 24 hour control room co-ordinates all requests for access to buildings and generates reports to confirm our attendance on-site, highlighting any issues found.

SUPPORT SERVICES

Support Services

DYMENSION is Kings' own operating platform and allows our customers to engage and assess their estates performance and operational management interactively through the use of data and information:

- Capture
- Intelligence
- Flow
- Share

Incident Management is brought to life through the **OneTouch** DYMENSION app which can be configured to suit a customer's bespoke reporting process. OneTouch can support all avenues of incident management; ranging from Health and Safety Management to Keyholder Response Management.

Technology Monitoring Centre

Providing our customers with cutting-edge security technology and round-the-clock monitoring, Kings is actively preventing criminal activity at our customers' sites; no matter how large or small.

Run by a dedicated team of monitoring operatives and fully qualified engineers, Kings provides our customers with 24/7 service support through its own UK Monitoring Centre and Remote Video Response Centre (RVRC).

Our technology centre is fully NSI Gold accredited and operated within the strict guidelines of ISO 9001, ISO 27001 and BS 5979. Our customers are assured of a high standard of protection day and night.

Kings provides our customers with
24/7 service support through its own
UK Monitoring Centre and Remote Video
Response Centre (RVRC).

HOMES OF DISTINCTION

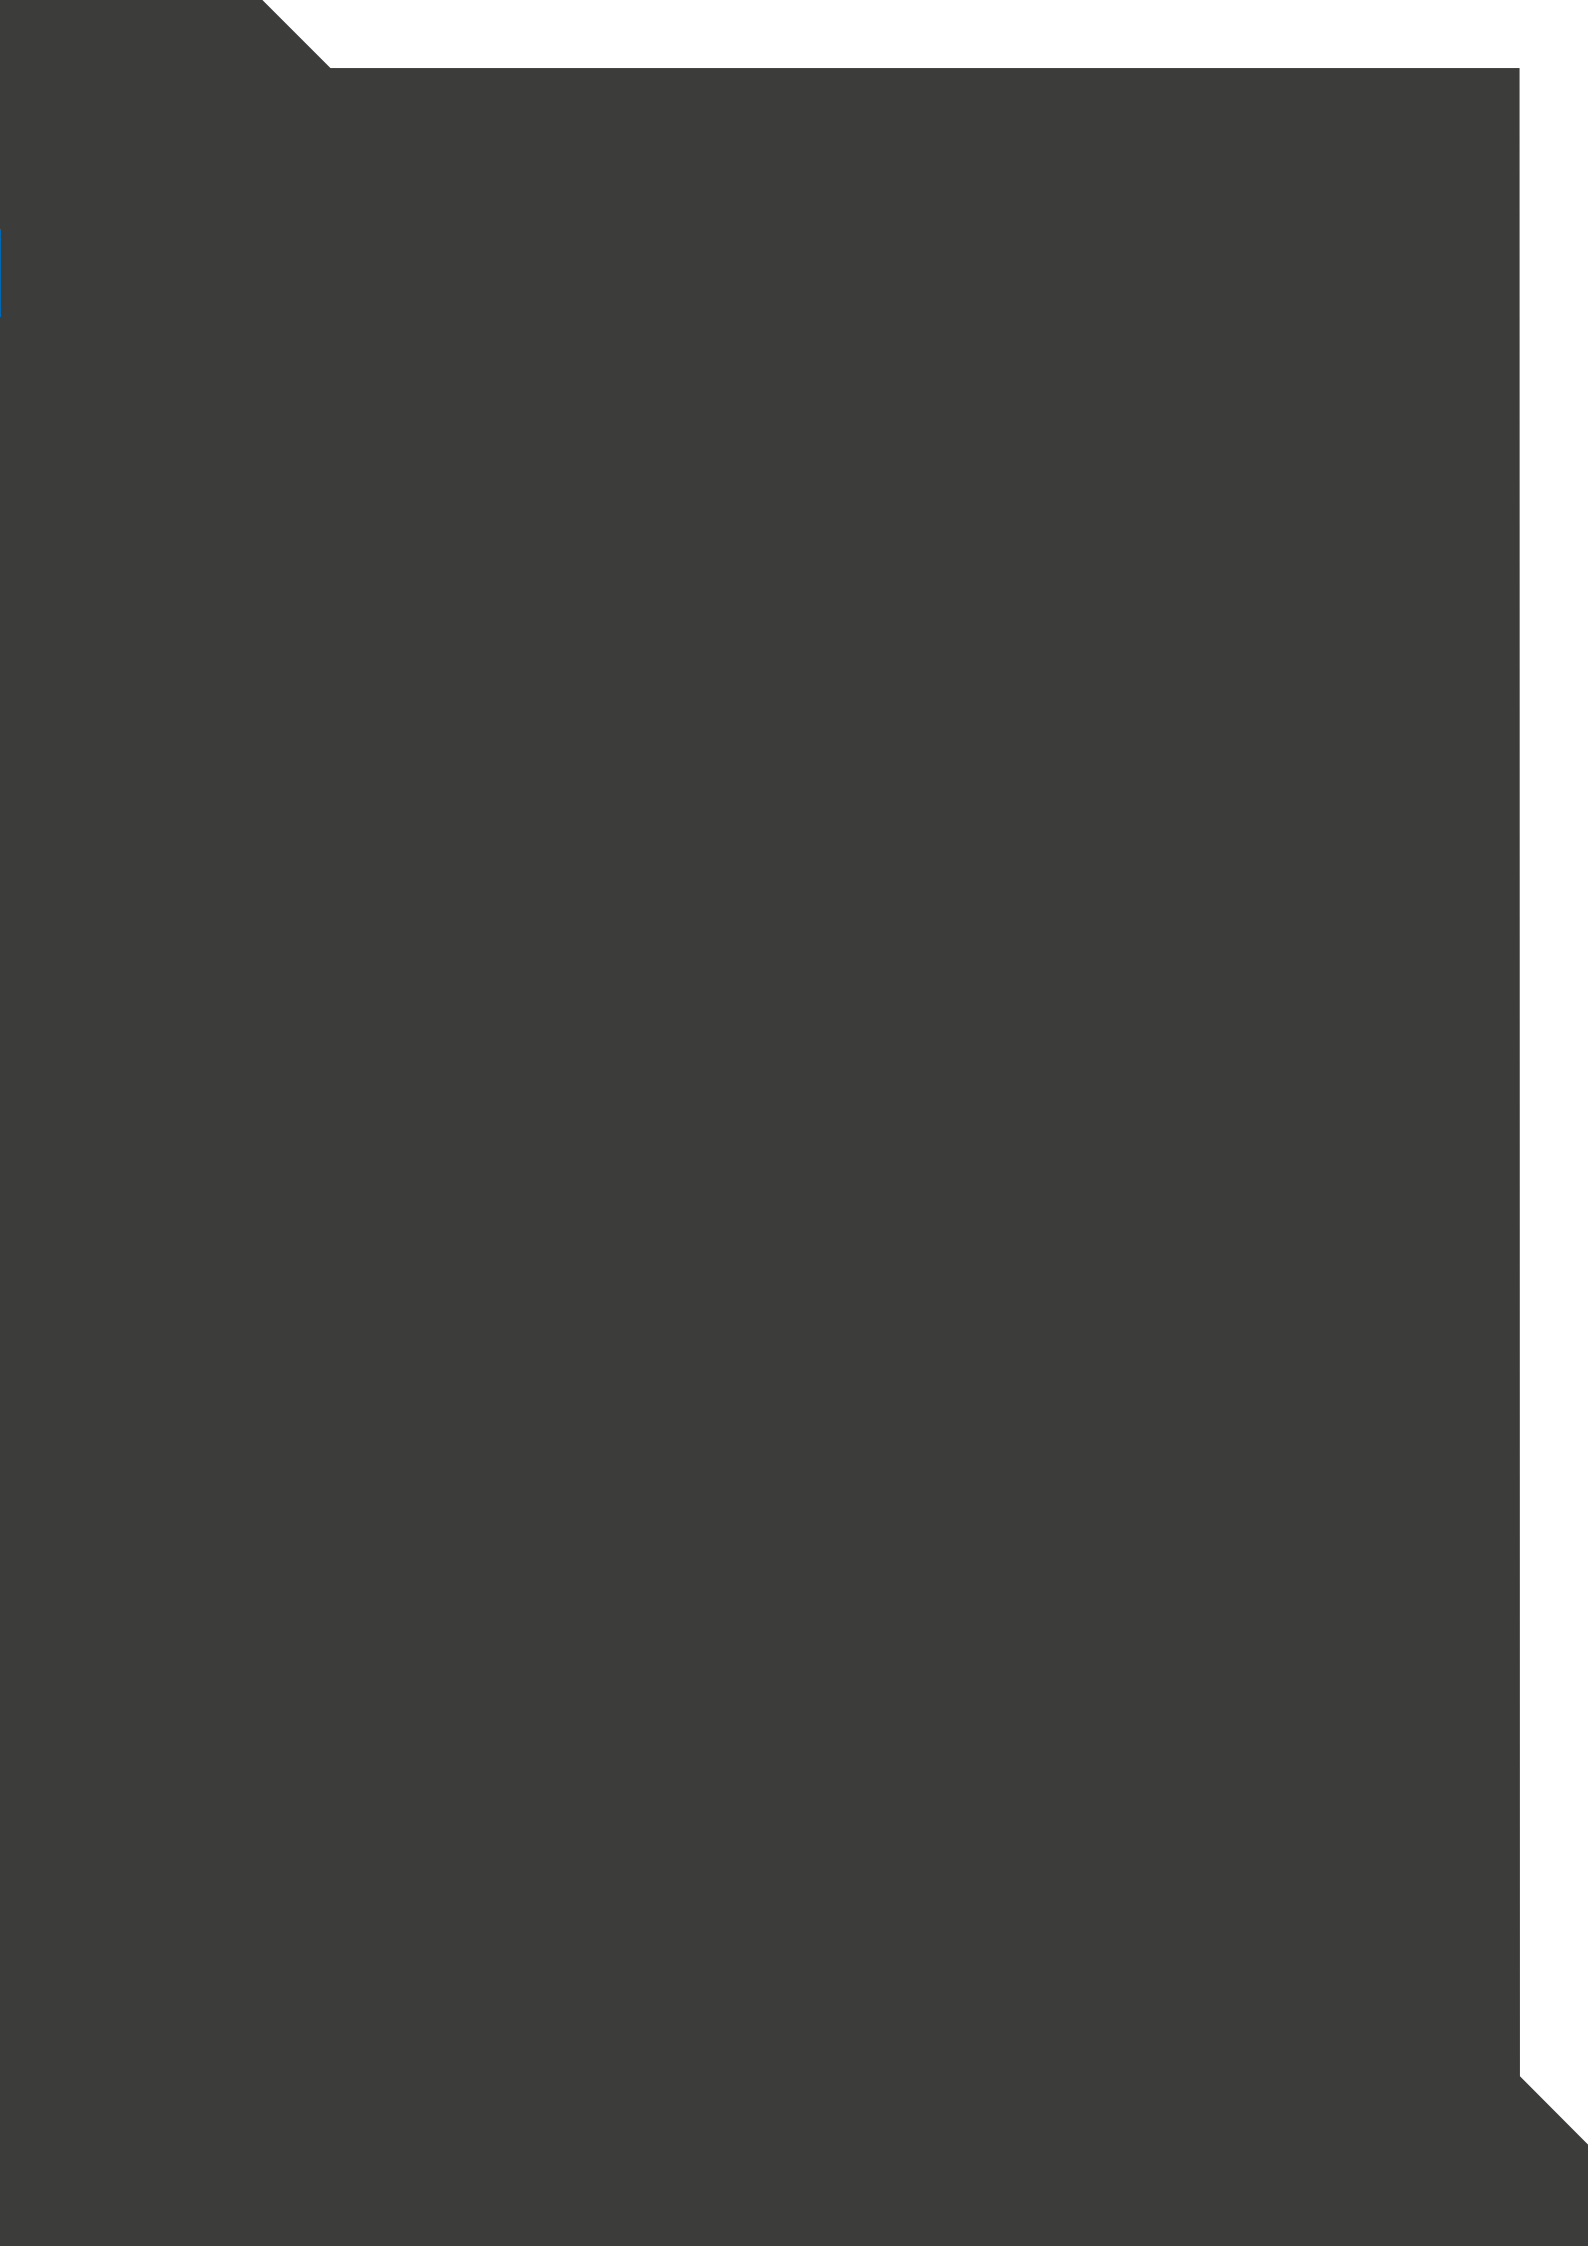

Kings Secure Technologies offers a tailored approach to the properties of high net worth individuals who have unique risks associated with their lifestyles, requiring a much higher degree of protection, service and monitoring excellence.

Homes of distinction vary from Country Estates to Town Houses to Executive Apartments with their own individual mixture of style and taste. This variety also expands to risk which becomes the key focus in providing the right security solution and services to meet the client's requirements, taking steps to also deliver an aesthetically pleasing finish.

With the expertise of liaising with senior security professionals and government agencies, over the years we have amassed a number of high profile executive property installations and supporting monitoring and maintenance packages. Our approach is discrete, professional and tailored to the customer's requirements by utilising the industry's latest technologies and supporting software.
