

**Industry:** Homes of Distinction

**Challenge:** No two prestigious homes have the same security requirements; a unique consultative approach is key to provide a bespoke solution

**Kings Secure Technologies offers a tailored approach to the properties of high net worth individuals who have unique risks associated with their lifestyles, requiring a much higher degree of protection, service and monitoring excellence.**

### The Challenge

Homes of distinction vary from Country Estates to Town Houses to Executive Apartments with their own individual mixture of style and taste. This variety also expands to risk which becomes the key focus in providing the right security solution and services to meet the client's requirements, taking steps to also deliver an aesthetically pleasing finish.

### A New Level of Security

We have an enhanced approach to these types of installations with Project Managers engaged from the start, liaising with the consultant providing a programme of works that suits the client's timescales regarding where we can and cannot work at what days and times. They facilitate when equipment can be delivered and oversee dependencies from third party contractors, such as ground works and power, making sure all involved are communicating to meet the requirements.

Our maintenance provision is also engaged from the last stages of the installation with a handover to the Regional Service Manager who will assign a 'familiar face' team of engineers. These engineers will have a good understanding of the systems installed and of the standard expected, with any site-specific assignment instructions documented.

Strict KPIs are assigned to every project utilising our DYMENSION software portal which offers incident management, live client feedback and communications.

### Why Choose Kings?

With the expertise of liaising with senior security professionals and government agencies, over the years we have amassed a number of high profile executive property installations and supporting monitoring and maintenance packages. Our approach is discrete, professional and tailored to your requirements by utilising the industry's latest technologies and supporting software across security, fire, CCTV & access control. We also offer a range of lone personnel applications and have the pedigree to offer you and your family 24/7 365 protection.
