

Key Holding

Our key holding and response service protects your business and its assets from unnecessary risk. We provide bespoke and flexible solutions to suit our customers' needs.

Patrolling

We offer innovative perimeter patrolling solutions that protect your assets and ensure a continuous deterrent.

Personnel

We provide security personnel to a whole cross-section of industries. We pride ourselves on delivering the right person for the right situation.

Kings Secure Technologies provides Security Personnel and key holding services, along with innovative, state-of-the-art security and fire installations and monitoring.

Kings' Security Personnel division provides security services 24 hours a day, 7 days a week, 365 days a year. We take a fresh and innovative approach to security provision; combining our experience in deploying security officers with our cutting-edge technology to deliver tailored solutions to our clients. Kings is an SIA approved contractor and accredited to NSI Gold Standard. Every security officer is fully licensed and provided with full bespoke training, dependant on the needs of our clients, and the environments in which they are working. We invest in all our Security Personnel, providing a range of employee benefits including the opportunity to enter our apprenticeship programme and achieve a recognised NVQ qualification.

We will ensure that every security officer we deploy to support your contract is of an exceptionally high calibre in terms of attitude, demeanour and appearance.

Kings is proud to partner some of the most well-known innovators and disruptors, software developers and designers across the Fire & Security sector. This unique position allows us to provide our customers with a truly complete solution. We currently partner with Milestone, HikVision, Nedap, Honeywell, Gent, Axis, CSL, Morphean to name just a few.

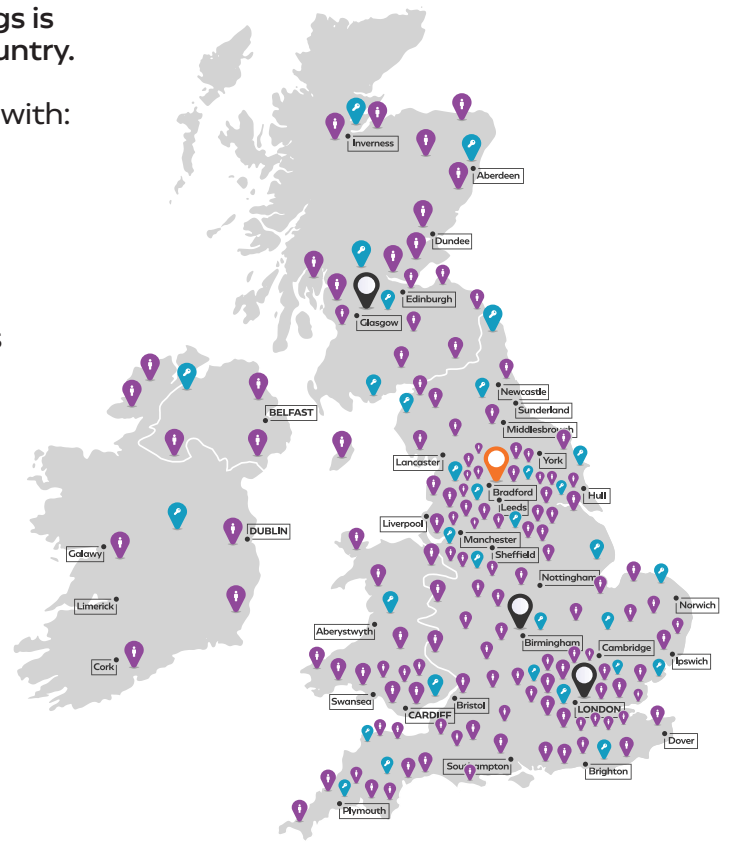

Kings Secure Technologies will work with you to ensure that the service we provide, and the cost of providing it, is based on your needs.

With a nationwide offering of Security Personnel Kings is proud to offer services covering the breadth of the country.

Kings Operating Centre has the ability to provide you with:

- Locally based workforce
- Locally situated trained relief team
- Locally based management teams (24 x 7)
- Keyholding and Mobile patrol response capabilities
- Full contract support capabilities
- Out of hours visits, inductions and reporting

Case Study

One of the UK's leading electronic leisure and technology device providers entrusts Kings Secure Technologies to provide a 3-year static and ad-hoc manned guarding, special event provision and keyholding/response service contract for its sites throughout the UK.

The Challenge:

Protecting its employees, customers and assets is key, but keeping the security welcoming and familiar in its high street stores was of equal importance to the client. Kings was asked to provide rapid response, deployment and mobilisation of highly-trained security personnel. The client was unwavering that Kings' personnel need to be as much ambassadors for the client's brand as its own employees; delivering a first-class service in a professional manner. Also of importance was Kings ability to respond quickly and professionally to ad-hoc special event provision.

The Solution:

Using Kings' own trend and data portal, DYMENSiON, Kings was able to offer the client a more flexible management and planned rapid deployment plan. DYMENSiON's OneTouch app provides an opportunity to create a new more integrated security and loss prevention model based on risk, giving the client significant savings on manpower provision with more effective and targeted security personnel. The use of DYMENSiON also allows bespoke SLAs to be agreed, monitored and adhered to.

As an SIA approved contractor and accredited to NSI Gold Standard, every Kings security officer is fully licensed and provided with bespoke training, dependant on the needs of our clients; making them much more customer-focused.
