# QuidvisRisk – The Complete Fire Risk Solution

Combined with our experienced fire consultants, QuidvisRisk delivers the most comprehensive evidence-based fire risk assessments and fire door inspections available. The reporting and risk management solution ensures we provide our clients with a detailed audit trail, covering every aspect of managing their risks. QuidvisRMS was developed to overcome the inconsistency of fire risk assessment reporting across the UK, and to ensure property owners can demonstrate and build the 'Golden Thread' of risk information in a single digital platform.

QuidvisRisk- Report and Management Features

- Estate and property report analysis
- Evidence-based risk reporting and analysis

FIRE RISK MANAGEMENT

QuidvisRisk – Fire Risk Assessments and Fire door Inspections

All our customer fire risk assessments and fire door inspections are completed on the QuidvisRiskApp, ensuring consistency and continuity is maintained regardless of which assessor is completing the assessment.

Our fire risk consultants are all qualified and experienced. The majority of our assessors are either Members of the Institution of Fire Engineers (IFE), Institute of Fire Safety Managers (IFSM) or equivalent professional bodies. All our consultants have also completed additional fire door inspectors' courses.

Improved productivity:

Fire risk assessments are generated automatically from the information the fire risk assessor captures in the QuidvisRiskApp, on site. Our unique software allows assessors to capture and make detailed notes.

Allowing assessors to spend more time on site completing a comprehensive assessment, rather than spending hours off-site writing up a report from notes taken.

Comprehensive assessments:

For every risk identified by Quidvis we capture:

- A risk rating and a detailed observation and recommendation
- Time and date stamped photographs
- The root cause of the risk: Electrical, People or Structural
- Risks identified, can be marked as 'Risk to Life' or 'Business Continuity'

Freedom and Flexibility:

Property owners can choose to licence QuidvisRMS to use their own internal assessment teams or split the estate between their in-house team and Quidvis.

Quality assured:

The QuidvisRisk solution has a built in Quality Control area, always ensuring a robust quality assurance process. Every assessment is checked by the assessor and a validator before it is released to the property owner.

Reduced carbon footprint:

The QuidvisRiskApp guarantees continuity and detail of reporting, allowing us to have fire consultants based all over the UK. This allows us to reduce travel time, and our carbon footprint.
