SECURE TECHNOLOGIES

Welcome to KST

Our complete security,
fire & life safety and risk
management solutions

Welcome to Kings Secure Technologies

Kings Secure Technologies (KST) brings together cutting-edge technology and innovation across the Fire, Security & Life Safety sectors; designing bespoke solutions that recognise risk mitigation and the need for cost control, but continue to deliver exceptional customer service. By using trend and data analytics to make long term sustainable decisions for our clients, and with a nationwide reach and international capability, KST delivers a one source solution for many of the world's best-known organisations. We have a long-standing commitment to excellence and innovation in the industry. As the sector advances, we are investing to develop and grow our market position with the ambition to be the largest independent Fire, Security and Life Safety Systems provider in the UK.

The team here at KST delivers a service to our customers that is innovative, professional and effective. These are attributes that have served us well through more than 50 years of growth, and they will continue to serve us in the future.

OUR MISSION

KST's vision is to lead, transform and innovate in the security, fire, life safety and compliance environments across Europe and beyond.

Our mission is to offer design-led solutions by applying and layering the latest technologies and services specific to our growing Group brands; benefitting our expanding client base.

KINGS

SECURE TOMORROW

Innovating Technology, Sustaining the Planet

Our Values

Kings Secure Technologies is a leading provider of security, fire and life safety solutions and services. We are committed to delivering excellence, innovation and customer satisfaction in everything we do. Our core values are the guiding principles that shape our culture, our behaviour and our decisions.

Integrity

We act with honesty, transparency and accountability in all our interactions with our clients, partners, suppliers and colleagues. We uphold the highest ethical standards and comply with all laws and regulations. We respect the confidentiality and privacy of our clients and their data. We do not tolerate any form of corruption, fraud or misconduct.

Quality

We strive to provide the best quality products and services to our clients. We adhere to the industry best practices and standards and continuously improve our processes and systems. We measure our performance and seek feedback from our clients and stakeholders. We invest in our people and technology to enhance our capabilities and deliver value.

Innovation

We embrace change and challenge the status quo. We foster a culture of creativity and curiosity, where we encourage new ideas and solutions. We leverage our expertise and experience to create innovative and bespoke security, fire and life safety solutions for our clients. We seek to anticipate and respond to the evolving needs and expectations of our clients and the market.

Collaboration

We work as one team, with one vision and one goal. We value the diversity and inclusion of our people and respect their opinions and perspectives. We communicate openly and effectively and support each other. We build strong and lasting relationships with our clients, partners and suppliers, based on trust and mutual benefit.

Client Focus

We put our clients at the heart of everything we do. We listen to their needs and expectations and deliver solutions that meet or exceed them. We aim to provide exceptional customer service and satisfaction. We seek to understand and anticipate the challenges and opportunities that our clients face and offer them the best solutions.

Certifications & Accreditations

The fire and security industry is always evolving, and so are we. To stay at the forefront, we ensure our products and services are independently assessed to meet high standards in capability, quality, and consistency.

At KST, we have earned industry-recognised accreditations such as CHAS, ISO, NSI, SIA and SafeContractor. These demonstrate our commitment to the highest standards in quality assurance, health and safety, environmental management and information security.

Our Partners

We are proud to partner some of the most well-known innovators and disruptors, software developers and designers across the whole sector.

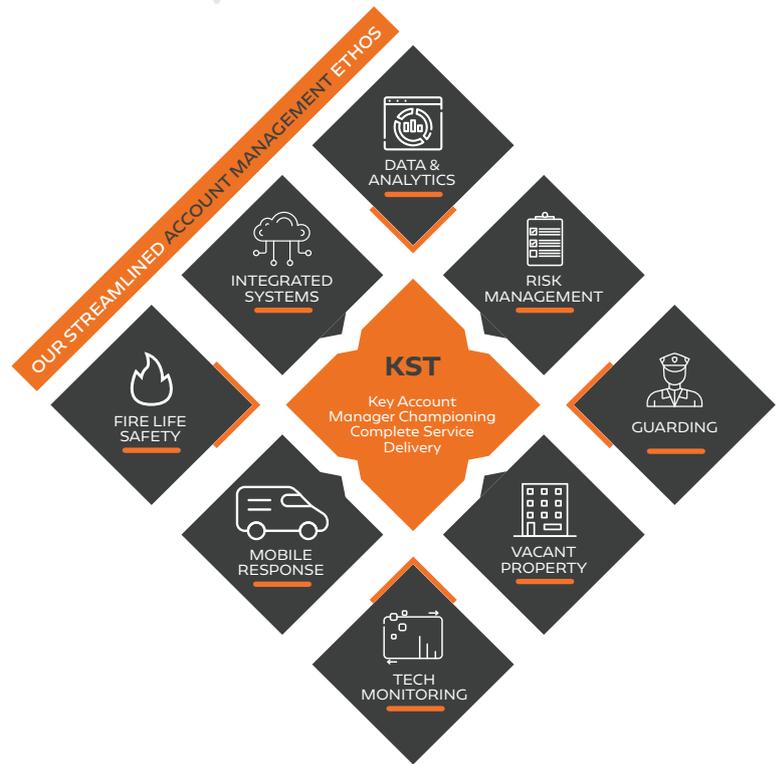

This unique position allows us to provide our clients with a truly complete solution.

Kings Group Solutions delivers integrated fire and security solutions through our in-house service divisions, providing our customers with improved service levels, value for money and brand protection.

Group Solutions play a critical role in driving cross-selling initiatives through account managers and account directors.

By understanding client needs, developing customised solutions and leveraging strategic selling techniques, Group Solutions significantly enhance client value and increase revenue. Continuous training, performance tracking and collaboration are essential components of successful cross-selling efforts, ensuring that we remain a trusted partner for all our clients' needs.

KST is a progressive security, fire & life safety and risk management solutions provider challenging traditional methods to evolve and overcome the demands of a world increasingly reliant on technology and data. By adapting our approach and investing in technology we are leading the industry in being able to effectively develop solutions tailored to individual business needs.

We use value maps to develop each solution giving:

- A detailed understanding of your business objectives
- The issues you're experiencing from a security perspective that are preventing you achieving these aims
- The enablers required by KST to overcome the issues
- The solution itself
- The benefits

By utilising the most innovative and up to date technologies, KST consistently reduces risk to business continuity, improves safety and compliance and increases clients' profitability.

Through dedicated account management, drawing upon service line expertise, we provide a seamless, integrated security solution underpinned by a real-time management information reporting platform, QuidvisRisk, to give visibility of performance against defined outputs.

Working closely with you, we shall design bespoke solutions which best suit your specific requirements and overcome your challenges.

At **Kings Security Systems**, obtaining a thorough understanding of our clients' business requirements and risks is the initial step in developing a solution that utilises electronic technology, complemented by our group services; monitoring, mobile response, guarding and fire safety systems.

Once client engagement has commenced, a single point of contact will be established to collaborate with our technical design department to conduct a physical site survey or work from detailed drawings and plans.

Our technical design department consists of dedicated technology experts who between them have over 100 years of industry experience.

We carefully evaluate our strategic partners and product offerings to ensure they are compatible with our technical, installation and service departments. This evaluation includes assessing their training, capabilities and expertise to ensure we choose the most suitable partner for each specific solution.

We can demonstrate our solutions by displaying a collection of annotated plans created by our in-house CAD department, accompanied by comprehensive suggestions.

Prior to the final presentation to the client, we engage our broader team of engineering leaders to evaluate the proposed solution in regards to delivery and after-care services. This includes determining whether project management is necessary and tailoring the commissioning process to meet the client's specific needs.

Once a solution has been presented, the Systems team can engage in a thorough discussion with the client regarding the proposed solution. This includes delivering demonstrations and, most importantly, introducing key personnel who will be involved in the project from beginning to end and beyond with ongoing maintenance support.

Silver Group is your total solution provider for all smoke ventilation technology requirements. With over 25 years experience in the industry we have won the trust of hundreds of businesses and local authorities across the country.

Having gained the respect of clients by delivering a level of thoroughness, planning and value for money many other companies cannot offer, Silver Group is considered a leader in the smoke ventilation sector. We design, install and maintain systems for a wide range of organisations including:

- Large commercial premises
- Warehousing and distribution
- Local authority buildings
- Residential blocks
- Offices and mixed use developments

Why Choose Silver Group?

OVER
25
YEARS
EXPERIENCE

- Innovative Solutions
- Highest Accreditations
- Fast, Thorough & Reliable
- Quality & Value

Design & Installation

Smoke ventilation systems provide occupants of a building compromised by smoke with additional, valuable time to evacuate safely. When partnering with you to create the perfect smoke ventilation system, we'll take you through four key stages: design, supply, installation and commissioning.

Stage 1
Design

Stage 2
Supply

Stage 3
Installation

Stage 4
Commissioning

Service & Maintenance

With our planned preventative AOV maintenance and emergency call-out service, we're not only offering cost effective comprehensive cover, but you can be reassured you always get the very best value. Regular maintenance benefits you in the long run as we can extend the life cycle of the smoke ventilation equipment whilst still ensuring that all legal requirements are met and you have a totally compliant solution.

Silver Group AOV Maintenance:

- Regular preventative servicing schedule
- Technical advice and support
- 24/7 emergency call out
- Fully trained, multi-disciplined engineers
- Detailed service record logbooks
- Ensuring complete compliance for you

Kings Guarding Solutions is recognised across the UK for designing and offering exceptional security and protection services to customers in a range of sectors. Our security guards are trained, licensed and insured to handle any kind of situation. Being equipped with the latest tools and technology, our staff ensure the safety and security of our clients.

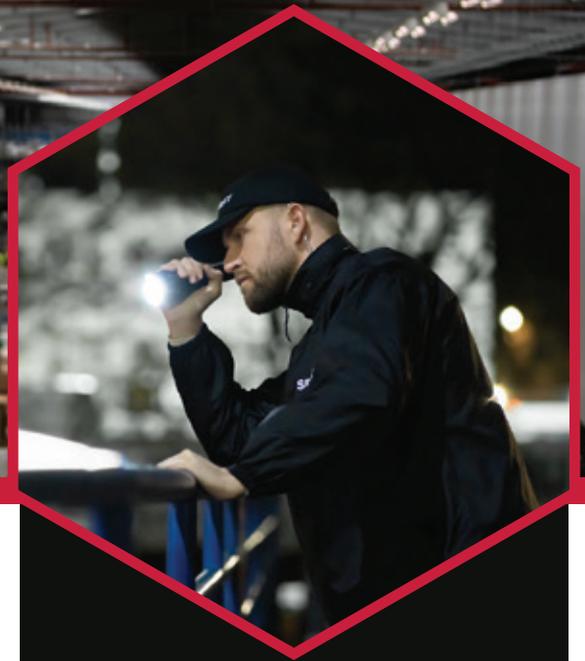

At Kings Guarding Solutions, we are aware that every client has different security requirements and challenges. We collaborate closely with our clients to fully comprehend their security objectives and create solutions that are tailored to their particular needs. Our dedication to quality guarantees that we provide the best protection services possible, customised to meet the demands of each and every client.

Our dedication to providing high-quality protection services sets us apart in the industry.

By integrating advanced strategies and state-of-the-art technology, we offer comprehensive security plans designed to offer peace of mind.

Kings Guarding Solutions is committed to maintaining the highest standards of security, ensuring that our clients receive unparalleled protection at all times.

Within our portfolio of protective services we offer physical security personnel, mobile patrols, key holding & alarm response, expert dog handling, concierge, alongside specialised industry proficiency such as retail security, warehouse and logistics security, fire marshal services and void property protection.

At the core of our operations lies a strong focus on technology - we are consistently striving to push boundaries and leverage technological advancements.

GRiD Mobile Response is a leading provider of mobile response and key holding services in the UK. We offer a fast, reliable and professional service, with trained and vetted staff who can respond to any alarm activation or emergency situation. We use the latest technology and equipment to ensure the safety and security of your premises, assets and staff. We tailor our services to your specific needs and budget, with flexible and transparent pricing and no hidden fees. We are accredited by the **Security Industry Authority (SIA)** and the **National Security Inspectorate (NSI)**, and we comply with all relevant standards and regulations.

Within our portfolio of protective services we offer mobile patrols, key holding & alarm response, alongside specialised industry services such as void property protection.

At the core of our operations lies a strong focus on technology – we are consistently striving to push boundaries and leverage technological advancements. Our own, in-house MI platform QuidvisRisk, enables us to deliver customised reporting and management benefits to a diverse range of clients, including small, medium and large businesses,

GRiD Mobile Response is a company that truly adds value to its clients.

Our Services

Mobile Patrols

Our mobile patrols are trained and licensed guards who will visit your site at regular intervals, either randomly or according to a pre-arranged schedule. They will perform thorough checks of your premises, such as doors, windows, fences, gates and alarms, and report any signs of damage, disturbance, or unauthorised access. They will also deter potential criminals by displaying visible signs of security presence, such as uniforms and vehicles.

Alarm Response

Our alarm response services are available 24/7, 365 days a year. We have a network of trained and licensed security guards who can reach your property within minutes of an alarm activation. They will inspect the premises, secure the area, and notify you and the authorities of any incident. They will also provide you with a detailed report, through our own MI platform, QuidvisRisk of their actions and findings.

Vacant Property Inspection

If you own or manage a vacant property, you know how challenging it can be to keep it secure and well-maintained. Vacant properties are attractive targets for criminals and troublemakers, we offer a range of vacant property security services to help you protect your assets and avoid costly repairs and legal claims. We have the experience and expertise to provide effective and affordable solutions for any type of vacant property, from residential to commercial to industrial.

Key Holding

Our key holding service is a complementary option that allows our mobile patrol officers to keep a set of keys to your premises on their person, so that they can quickly respond to any alarm activations or emergencies. This way, you do not have to worry about losing your keys, or entrusting them to your staff or third parties. Our key holders will also act as your first point of contact in case of any incidents, and liaise with the police, fire brigade or other emergency services if needed.

K-SOC is proud to host one of the UK's most sophisticated monitoring centres. Our Cat 1 EU Accredited, NSI Gold ARC delivers state-of-the-art monitoring solutions and can handle hundreds of thousands of connections effortlessly, ensuring properties remain safe and secure.

Alarm, CCTV & Fire Safety Management

K-SOC hosts the latest full range of cloud-based and remotely managed monitoring solutions via its own Technology Centre, and Remote Video Response Centre (RVRC).

In the event of a fire breaking out, your fire alarm panel will switch over a relay sending a signal to K-SOC's technology monitoring centre - operators are then able to facilitate 24/7 emergency response.

We utilise the latest industry standard technologies providing a cutting edge surveillance service for our clients.

The centre is run by a dedicated team of fully qualified SIA licensed operatives to provide 24/7 service support.

False Alarm Management

The K-SOC monitoring centre excels in False Alarm Management, showcasing innovation through precise detection and minimisation of false alarms. It ensures Echo-connected Police response, facilitating swift law enforcement action. Additionally, its proactive system health monitoring guarantees optimal performance and reliability.

Dedicated Desks

K-SOC's dedicated desks offer clients constant monitoring, ensuring a more proactive approach to service provision. Our virtual guard tours service, on the other hand, employs remote surveillance technology to monitor multiple sites, offering flexibility and cost-effectiveness.

Lone Worker, Welfare & Personnel Management

Keep your people safe and protected with the latest in lone worker solutions. K-SOC's technology monitoring centre allows you to communicate with, identify, locate, report and respond to individual lone workers and vulnerable people.

PROTECT offers a risk based, rapidly deployable, security and property management solution.

As specialists in providing temporary security, PROTECT understands how important it is for clients to have a readily available cost effective solution which is both insurance compliant and effective.

Vacant Property Protection

Our services include:

- Site security: Key holding and response, canine patrols, fixed and temporary alarm monitoring
- Bailiff and traveller eviction services
- Vacant property inspections, meter readings, maintenance checks, health and safety reviews
- Ongoing insurance and health and safety assessments
- Real time incident reporting through QuidvisRisk
- Cleaning and clearance: fly tipping, clinical / hazardous waste removal, needle sweep and graffiti removal
- Pest control proofing works
- Landscaping and grounds maintenance

Temporary Security

Our services include:

- Rapid deployment CCTV towers
- Permanent and temporary intruder, fire and flood alarms, steel security screens and doors, fencing
- Temporary access control systems
- Manned and mobile guarding
- Lock changes
- Emergency boarding up and glazing services
- Utility cut offs and drain downs
- Real time incident reporting through QuidvisRisk

Quidvis specialises in delivering detailed evidence-based risk assessments and fire door inspections.

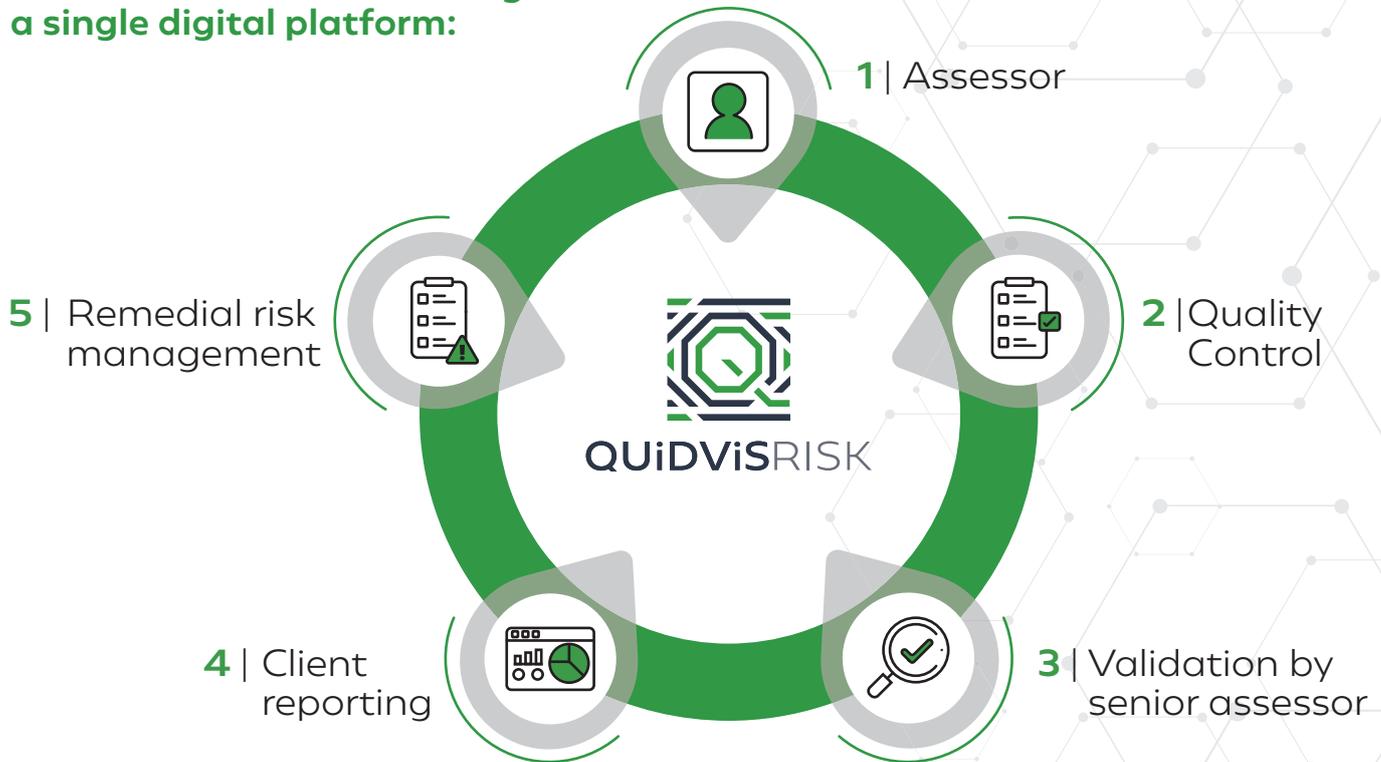

QuidvisRisk, our risk management portal, has revolutionised the way that **Risk Assessments, Fire Door Inspections** and **Water Risk Assessments** are carried out and reported. We have removed all paper and Excel reports from our business assessment and reporting process completely; providing our teams and clients with the latest technology and software to manage the whole process from start to finish.

All assessments are completed using the QuidvisRisk App, allowing our teams to carry out detailed, comprehensive assessments without the need for paper.

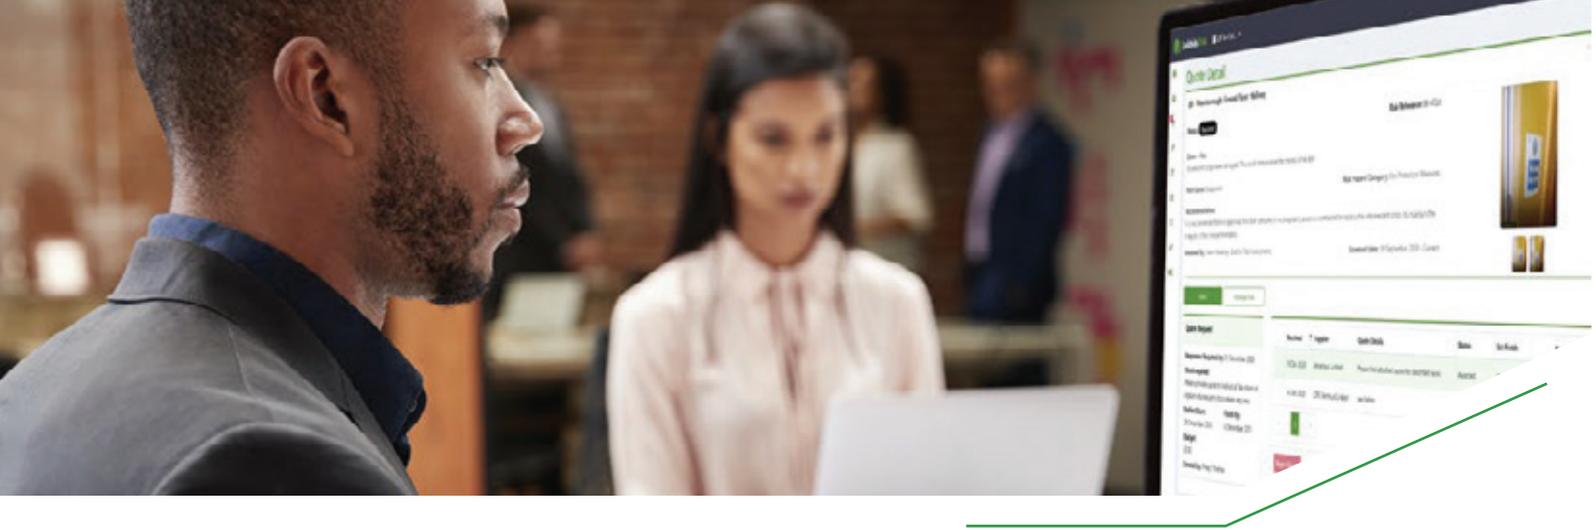

This is not only environmentally friendly, importantly it guarantees that our assessments are comprehensive and consistent and are instantly in the QuidvisRisk system.

This allows the Quidvis team to quality control, validate and deliver the reports to our clients quickly and professionally. Our clients can use QuidvisRisk to manage the risks, and even allocate work internally and externally; providing a detailed and comprehensive record for every risk managed.

QuidvisRisk provides clients with a true 'Golden Thread' for risk management in a single digital platform:

What's more, for companies who wish to integrate QuidvisRMS with their other internal systems, there is an API available.

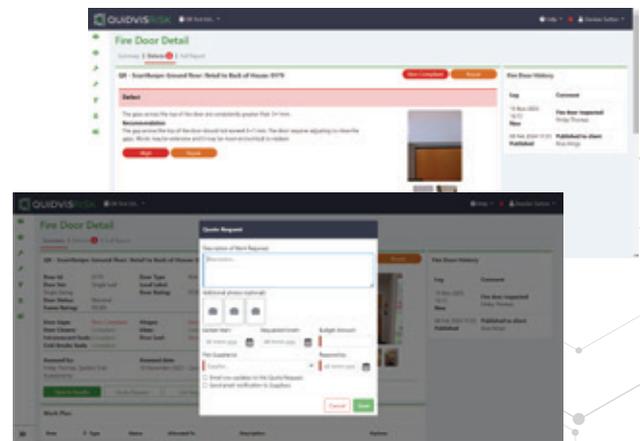

REMEDIAL RISK MANAGEMENT

The Hackitt report, following the Grenfell disaster, talks about the ‘Golden Thread’ of information being held in a single digital platform. The QuidvisRisk reporting and risk management platform has been designed to do just that. Allowing companies to view their fire risk assessments and manage the remedials all from the one system.

QuidvisRisk provides our clients with the control and flexibility to manage the work required to resolve identified risks, while ensuring they have a detailed and complete audit trail for all work carried out and risks resolved. This includes the following functionality:

- Assign jobs to internal or external contractors
- Raise supplier quote requests
- Add unlimited amount of suppliers
- Work progress reporting
- Sign off and resolve jobs completed by supplier
- Performance and spend reports by supplier
- Detailed audit trail of works carried out, including work requested, scope agreed, work signed off, risk resolved, recording who did what, when and how much was spent

Auto Allocation

We understand the benefits of getting work started as soon as possible. QuidvisRisk allows our clients to preselect certain risk types, and the person or supplier that would be responsible for carrying out the remedial work. For example, a risk identified that is caused by certain electrical issues may be allocated to the property department or a 3rd party company. This feature reduces the work of the client considerably, especially on large estates, and importantly ensures that work is started or planned as soon as possible.
